Panorama freezer island with sliding glass panels. Switchable between normal and low temperature. A modern and consumer-friendly design that combines robustness and lightness, thanks to the full height windows on all 4 sides that guarantee maximum visibility of the product on display.

Sustainability with R290 as refrigerant

Maximum transparency

Energy efficiency, cost savings and contribution to environmental protection

Flexibility and modularity

Customizable finishes

Easy service maximizes productivity and minimizes service costs

- Maximum transparency
- Excellent product presentation with high insulating glazing (triple glazing)
- Convenient access to goods
- Flexibility and modularity
- Easy installation
- Environmentally friendly natural refrigerant R290 propane
- Convection cooling
- Fully automatic temperature control
- Automatic hot gas defrosting
- Fully hermetic cooling unit

Installation
Plug-in
